Education

Aditya Engineering College CGPA: 8.57
B.Tech, Computer Science and Engineering, Expected June 2026
Andhra Polytechnic College Percentage: 92.4
Diploma, Computer Engineering, June 2023

Skills

- **Programming:** C++, Python, SQL
- **Full-Stack Development:** HTML, Tailwind CSS, JavaScript, React.js, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Docker, Linux
- **Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS
- **AI & GenAI:** LLM Fundamentals, Prompt Engineering, RAG, Embeddings
- **Tools:** Git, GitHub, Postman

Projects

- **Event-Driven Analytics Platform** [GitHub]
  Tools: Node.js, Express.js, RabbitMQ, CQRS, Docker
  - Designed an event-driven analytics platform using RabbitMQ to process real-time events efficiently.
  - Applied CQRS to separate write services and analytics read models, improving query speed.
  - Developed asynchronous event consumers to process activity streams with sub-second latency.
- **Distributed Rate Limiting Service** [GitHub]
  Tools: Node.js, Express.js, Redis, Docker
  - Engineered a Redis-based rate limiter to regulate API requests across microservices.
  - Implemented distributed API rate limiting using the Sliding Window Log algorithm with Redis.
  - Ensured strong consistency under high concurrency using Redis atomic operations and Lua scripts.
- **AI-Powered Intent Router** [GitHub]
  Tools: Node.js, Express.js, Gemini API
  - Developed a backend service that classifies user intent using the Gemini API and routes requests through intent-specific prompt templates.
  - Engineered a two-stage LLM workflow separating intent detection from response generation for improved modularity.

Experience

- **Partnr Network** [Link] *Dec 2025 - Present*
  Global Placement Program Remote
  - Completed weekly backend engineering assignments as part of the Global Placement Program.
  - Built production-style backend projects
  - Strengthened backend engineering skills through project-based learning, iterative feedback, and modern software engineering practices.
- **Technical Hub** [Link] *June 2025 - July 2025*
  AWS Cloud Intern Kakinada, India
  - Developed automated backup solutions using AWS (S3, Lambda), enhancing data reliability and reducing manual intervention.
  - Automated start and stop of AWS EC2 instances using AWS Lambda and scheduled triggers.

Certifications & Achievements

- **Docker Essentials: A Developer Introduction**, IBM
- **Postman API Fundamentals Student Expert**, Postman
- **Programming Essentials in C++**, Cisco
- **Solved 950+ coding problems** across LeetCode, GeeksforGeeks, and CodeChef.
- **Top 10 Finalist** in Project Space 2025, securing 9th place out of 123 teams.
